THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

# **PART B - FEE(S) TRANSMITTAL**

**Complete and send this form, together with applicable fee(s), to:** Mail **Mail Stop ISSUE FEE**  
**Commissioner for Patents**  
**P.O. Box 1450**  
**Alexandria, Virginia 22313-1450**  
**or Fax** **(571)-273-2885**

**INSTRUCTIONS:** This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 189 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 189 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

**STATEMENT OF REASONS FOR ALLOWANCE  
AND  
EXAMINER'S AMENDMENT**

***Election/Restrictions***

1. Applicant's election without traverse of Species I (claims 1-4, 6, 8-9, 11-22, 24, 33-34, and 39-40) in the reply filed on 2/19/2008 was acknowledged in the Office Action of April 22, 2008.

***Examiner's Amendment***

2. In order to better place the application in order for allowance, unelected claims 25-32 and 35-38 are hereby cancelled via examiner's amendment. Claim 23, being dependent on claim 13 or claim 14, is rejoined.

***Response to Amendment***

3. Applicant's amendment filed on July 22, 2008 has been entered. Claims 13-14, 16-24, 33-34, 40, and 45-49 are still pending in this application, with claims 13-14, 21-22, 33-34, 40, and 45-49 being independent. Claims 1-12, 15, 39, and 41-44 have been cancelled.

In light of Applicant's amendment filed on July 22, 2008, the objection to claim 21 in the Office Action of April 22, 2008 is withdrawn.

***Allowable Subject Matter***

4. Claims 13-14, 16-24, 33-34, 40, and 45-49 are allowed.

Regarding **claim 13 and subsequent dependent claims**, Bolle et al disclose an object determining device comprising a detecting part for detecting a face of a person from an input image (column 4, lines 26-44). Sannoh et al disclose a determining part for determining, when a plurality of faces of people are detected by the detecting part, a face to be focused and/or subject on which to perform exposure control when performing imaging from the plurality of faces of people based on positions of the plurality of faces of people (paragraphs 105 and 117).

However, Bolle et al in combination with Sannoh et al do not disclose a center determining portion for determining a center of the positions of the plurality of faces based on the positions of faces of people and a face determining portion for determining a target face based on the position of the center. In fact, Sannoh et al disclose a center determining portion (paragraphs 105 and 117), but it determines the face near the center of the image, rather than the center of the plurality of faces.

Regarding **claim 14 and subsequent dependent claims**, Bolle et al disclose an object determining device comprising a frame acquiring section for acquiring an image of a predetermined frame as an image to be processed from an input time-series image including a plurality of frames (column 6, lines 43-45; column 7, lines 1-9); and a detecting part for detecting a face of a person from the image to be processed (column 4, lines 17-24). Sannoh et al disclose a determining part for determining, when a

plurality of faces of people are detected by the detecting part, a face to be focused and/or subject on which to perform exposure control when performing imaging from the plurality of faces of people based on positions of the plurality of faces of people (paragraphs 105 and 117).

However, Bolle et al in combination with Sannoh et al do not disclose a center determining portion for determining a center of the positions of the plurality of faces based on the positions of faces of people and a face determining portion for determining a target face based on the position of the center. In fact, Sannoh et al disclose a center determining portion (paragraphs 105 and 117), but it determines the face near the center of the image, rather than the center of the plurality of faces.

Regarding **claim 21 and subsequent dependent claims**, Sannoh et al disclose an object determining device comprising a detecting part for detecting a face of a person from an input image and a determining part for determining, when a plurality of faces of people are detected by the detecting section, a face of a person positioned in the middle as a face to be focused and/or subject on which to perform exposure control when performing imaging (paragraphs 105 and 117).

However, Sannoh et al do not disclose wherein the face to be focused and/or subject on which to perform exposure control is determined with the number of detected faces as a reference.

Regarding **claim 22 and subsequent dependent claims**, Bolle et al disclose an object determining device comprising a frame acquiring section for acquiring an image of a predetermined frame as an image to be processed from an input time-series image

including a plurality of frames (column 6, lines 43-45; column 7, lines 1-9) and a detecting part for detecting a face of a person from the image to be processed (column 4, lines 17-24).

Sannoh et al disclose a determining part for determining, when a plurality of faces of people are detected by the detecting part, a face of a person positioned in the middle as the face to be focused and/or face on which to perform exposure control when performing imaging.

However, the prior art does not disclose wherein said face is to be focused and/or face on which to perform exposure control when performing imaging is determined with the number of detected faces as a reference.

Regarding **claim 33**, Bolle et al disclose a computer readable medium containing a program for an information processing device (column 3, lines 29-30; column 4, lines 38-44), said program when executed by the processing device causes the processing device to perform a method comprising the steps of detecting a face of a person from an input image (column 4, lines 26-44).

Sannoh et al disclose determining, when a plurality of faces of people are detected, a face to be focused and/or face on which to perform exposure control when performing imaging from a plurality of faces of people based on positions of the plurality of faces of people.

However, Bolle et al in combination with Sannoh et al do not disclose a center determining portion for determining a center of the positions of the plurality of faces based on the positions of faces of people and a face determining portion for determining

a target face based on the position of the center. In fact, Sannoh et al disclose a center determining portion (paragraphs 105 and 117), but it determines the face near the center of the image, rather than the center of the plurality of faces.

Regarding **claim 34**, B Bolle et al disclose a computer readable medium containing a program for an information processing device (column 3, lines 29-30; column 4, lines 38-44), said program when executed by the processing device causes the processing device to perform a method comprising the steps of detecting a face of a person from an input image (column 4, lines 26-44).

Sannoh et al disclose determining, when a plurality of faces of people are detected, a face of a person positioned in the middle as a face to be focused and/or face on which to perform exposure control when performing imaging (paragraph 105 and 117).

However, the prior art does not disclose wherein said face is to be focused and/or face on which to perform exposure control when performing imaging is determined with the number of detected faces as a reference.

Regarding **claim 40**, Bolle et al disclose an object determining device comprising a face detecting part for detecting, from an image based on arbitrary focal point information as an image to be processed, a face of a person based on a relative value of statistics in a plurality of characteristic regions produced by contour or parts of a face of a person from the image to be processed (column 4, lines 17-25; Figure 2); and a determining part for determining a subject to be focused and/or subject on which to

perform exposure control when performing imaging based on the face detected by the face detecting part (column 5, lines 28-31, 45-49; Figure 2).

Sannoh et al disclose wherein when a plurality of faces of people are detected by the face detecting part, the determining part determines a face of a person positioned in the middle, with the number of detected faces as a reference, as the face to be focused and/or face on which to perform exposure control when performing imaging (paragraphs 105 and 117).

However, Bolle et al in combination with Sannoh et al do not disclose wherein the face to be focused and/or subject on which to perform exposure control is determined with the number of detected faces as a reference.

Regarding **claim 45**, Bolle et al disclose an object determining device comprising a frame acquiring part for acquiring an image of a predetermined frame as an image to be processed from a time-series image including a plurality of frames imaged based on arbitrary focal point information (column 6, lines 43-45; column 7, lines 1-9); a face detecting part for detecting a face of a person based on a relative value of statistics in a plurality of characteristic regions produced by contour or parts of a face of a person from the image to be processed (column 4, lines 17-25; Figure 2); and a determining part for determining a subject to be focused and/or subject on which to perform exposure control when performing imaging based on the face detected by the face detecting part (column 5, lines 28-31, 45-49; Figure 2).

Sannoh et al disclose wherein when a plurality of faces of people are detected by the face detecting part, the determining part determines a face of a person positioned in

the middle, with the number of detected faces as a reference, as the face to be focused and/or face on which to perform exposure control when performing imaging (paragraphs 105 and 117).

However, Bolle et al in combination with Sannoh et al do not disclose wherein the face to be focused and/or subject on which to perform exposure control is determined with the number of detected faces as a reference.

Regarding **claims 46-49**, a similar analysis may be made as for claims 14, 21, 22, and 45 above, respectively.
